KEYWORD INDEX

VOLUME 16

JOURNAL
OF THE
AMERICAN SOCIETY
OF
SUGAR BEET
TECHNOLOGISTS

EXECUTIVE COMMITTEE

President ..... Lloyd W. Norman
Utah-Idaho Sugar Company
Moses Lake, Washington

Vice President ..... R. T. Johnson
Spreckels Sugar Company
San Francisco, California

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... George E. Rush
West Coast Cooling Company, Inc.
Richmond, British Columbia, Canada

BOARD OF DIRECTORS

Pacific Coast Region:	Lauren M. Burtch
Intermountain Region:	Kent Nielson
Eastern Rocky Mountain Region:	Glen W. Yeager
North Central and Great Lakes Region:	John J. Niederer
Canada:	Dwight Purdy
Processing at Large:	Stanley E. Bichsel
Agricultural at Large:	John S. McFarlane

Manuscripts submitted for publication and communications pertaining to editorial matters should be sent to James H. Fischer, Secretary-Treasurer, American Society of Sugar Beet Technologists, P. O. Box 538, Fort Collins, Colorado 80521.

Each manuscript received for publication will be appraised for its technical and historical value by a Publications Committee. The Publications Committee shall have final authority regarding publication of manuscripts. The Journal of the American Society of Sugar Beet Technologists shall contain papers presented at General and Regional meetings and articles of immediate interest prepared specifically for this periodical.

Material submitted to the Publications Committee for publication becomes the property of the American Society of Sugar Beet Technologists. The Publications Committee will have jurisdiction over the release of papers and abstracts for use other than in the Journal.

AUTHOR INDEX

ArpAL
Arp, A. L.
Yield response of sugarbeets under various light intensities as influenced by kochia density----------16(6) 479

BernWO
Bernhardt, W. O.
Potassium ion detector for monitoring boiler feedwater----------16(2) 142

BichSE
Bichsel, S. E.
A study of some physical and chemical parameters affecting nonsugar - sugar partition with cellulose acetate membrane----------16(1) 26
The direct production of liquid sugar from ion exchange treated thick juice----------16(2) 149
Experimental results obtained in decolorizing and desalting dilute molasses solutions with permasep ultra filtration modules--------16(3) 197
Utilization of concentrated ion exchange nonsugar waste on dried beet pulp----------16(4) 348

BushHL
Bush, H. L.
Estimating general combining ability from an incomplete crossing system----------16(3) 264

CalpoL
Calpouzos, L.
The life span and number of leaves produced by sugarbeet plants infected with *Cercospora beticola*----------16(1) 41

CarpTD
Carpenter, T. D.
Utilization of concentrated ion exchange nonsugar waste on dried beet pulp----------16(4) 348

CaslBD
Caslin, B. D.
Rapid determination of nitrate-nitrogen in sugarbeets with the specific ion electrode----------16(1) 64

ChriLM
Christoffer, L. M.
A study of some physical and chemical parameters affecting nonsugar-sugar partition with cellulose acetate membrane----------16(1) 26

CranGL
Crane, G. L.
The life span and number of leaves produced by sugarbeet plants infected with *Cercospora beticola*----------16(1) 41

CresRM
Cressman, R. M.
Studies on the permeability of sugarbeet tissue to stored sugar----------16(7) 595

DextST
Dexter, S. T.
Storage and clear juice characteristics of topped and untopped sugarbeets grown in 14- and 28-inch rows----------16(2) 97
A method of evaluating the processing characteristics of sugarbeets, based on juice constituents: A prescription of beet quality----------16(2) 128
A study of changes in the marc content of the sugarbeet during storage----------16(4) 289
Effect of agronomic and storage practices of raffinose, reducing sugar, and amino acid content of sugarbeet varieties----------16(5) 369
Source of recoverable sugar losses in several sugarbeet varieties during storage----------16(5) 390

DillMA
Dillon, M. A.
Rapid determination of nitrate-nitrogen sugarbeets with the specific ion electrode----------16(1) 64
Sugarbeet growth as influenced by row width, nitrogen fertilization, and planting date----------16(7) 585

DoneDL
Doney, D. L.
Effects of *Aphanomyces cochlioides* and *Pythium ultimum*, alone and as complexes, with *Heterodera schachtii* on sugarbeet--------16(3) 214
Genetic diversity in sugarbeet lines selected for nematode resistance----------16(3) 219
Quantitative relationships of three free amino acids in fibrous roots of nematode infected sugarbeet----------16(4) 341

DotzAD
Dotzenko, A. D.
Yield response of sugarbeets under various light intensities as influenced by kochia density----------16(6) 479

EisFG
Eis, F. G.
Potassium ion detector for monitoring boiler feedwater----------16(2) 142

EricAW
Ericksen, A. W.
Estimating general combining ability from an incomplete crossing system----------16(3) 264

FaraSA
Farag, S. A.
Some physical characteristics of sugar crystals affecting dust formation----------16(6) 448

FelbEH
Felber, E. H.
New process for deliming thin juice without regenerating agents and waste water----------16(4) 279

FifeJM
Fife, J. M.
Beet yellows disease: Correlation between amino acid ratio and tolerance with respect to percent sucrose and yield----------16(3) 188
Quantitative relationships of three free amino acids in fibrous roots of nematode infected sugarbeet----------16(4) 341

FollRJ
Follett, R. J.
Seasonal leaf area, dry wieght, and sucrose accumulation by sugarbeets----------16(3) 235

FrakMG
Frakes, M. G.
Storage and clear juice characteristics of topped and untopped sugarbeets grown in 14- and 28-inch rows----------16(2) 97
A method of evaluating the processing characteristics of sugarbeets, based on juice constituents: A prescription of beet quality----------16(2) 128

FranWT
Franklin, W. T.
Rapid determination of nitrate-nitrogen in sugarbeets with the specific ion electrode----------16(1) 64

GaskJO
Gaskill, J. O.
Inheritance of resistance to *Cercospora* leaf spot in sugarbeet----------16(2) 172
Preliminary report on breeding sugarbeet for combined resistance to leaf spot, curly top, and *Rhizoctonia*----------16(3) 207
Techniques for evaluating sugarbeet for resistance to *Cercospora beticola* in the field----------16(5) 384

GucciG
Guccione, G.
Results of a fertilizer starter test in Alberta----------16(2) 181
Evaluation of herbicides for weed control in sugarbeets in Manitoba----------16(7) 552

HardEE
Harden, E. E.
Development of monogerm sugarbeet seeds as influenced by soil fertility----------16(4) 332

HarriM
Harrison, M.
Some speculations on the role of dopamine in the resistance of sugarbeets to *Cercospora* leaf spot----------16(1) 34

HeckRJ
Hecker, R. J.
Some speculations on the role of dopamine in the resistance of sugarbeets to *Cercospora* leaf spot----------16(1) 34
Inheritance of 3-Hydroxytyramine in sugarbeet; a phenolic compound associated with *Cercospora* leaf spot----------16(1) 52
Comparison of the same sugarbeet F_1 hybrids as diploids, triploids and tetraploids--------16(2) 106
Techniques for leaf sampling and automated analysis of sugarbeet leaf amino acids--------16(7) 530

HelmRH
Helmerick, R. H.
Comparison of the same sugarbeet F_1 hybrids as diploids, triploids and tetraploids--------16(2) 106

HenscT
Henscheid, T.
Application of ion-selective electrodes in the beet sugar industry----------16(6) 482

HerrLJ
Herr, L. J.
In vitro zoospore production, motility, and germination of *Aphanomyces cochlioides*--------16(6) 508
Hot water treatment for elimination of seed-borne *Phoma betae* and other microbial contaminants from sugarbeet seed----------16(7) 568

HillFJ
Hills, F. J.
Effect of planting date and vector control on the suppression of curly top and yellows in sugarbeet----------16(1) 78
Effect of row covering materials and depth of planting on sugarbeet emergence----------16(2) 168

HogaCS
Hogaboam, C. S.
Powered auger aids in planting mother beets-------16(7) 605

HoweWE
Howell, W. E.
The relationship between agricultural practices and the occurrence of volunteer sugarbeets in Washington----------16(6) 441

JameDW
James, D. W.
Residual soil nitrate measurement as a basis for managing nitrogen fertilizer practices for sugarbeets----------16(4) 313

KarlWR
Karlheinz, W. R.
The application and utility of magnesium exchange in the beet sugar process----------16(4) 299

KarnVV
Karnik, V. V.
Physio-chemical and micro-biological studies on controlled atmosphere storage of sugarbeets----------16(2) 156
Evaluation of effects of controlled atmosphere storage on roots of sugarbeets grown at various levels of nitrogen fertilizer----------16(3) 225

KlassM
Klassen, M.
Evaluation of herbicides for weed control in sugarbeets in Manitoba----------16(7) 552

LangWH
Lange, W. H.
Effect of planting date and vector control on the suppression of curly top and yellows in sugarbeet----------16(1) 78

LevaJA
Levad, J. A.
Experimental results obtained in decolorizing and desalting dilute molasses solutions with permasep ultra filtration modules--------16(3) 197
Utilization of concentrated ion exchange nonsugar waste on dried beet pulp----------16(4) 348

LeweRT
Lewellen, R. T.
Performance of multigerm triploid sugarbeet hybrids when space planted----------16(7) 577

McFaJS
McFarlane, J. S.
A plot seeder for sugarbeet field experiments----------16(5) 422
Performance of multigerm triploid sugarbeet hybrids when space planted----------16(7) 577

MaagGW
Maag, G. W.
Some speculations on the role of dopamine in the resistance of sugarbeets to *Cercospora* leaf spot----------16(1) 34
Inheritance of 3-Hydroxytyramine in sugarbeet; a phenolic compound associated with *Cercospora* leaf spot resistance----------16(1) 52
Comparison of the same sugarbeet F_1 hybrids as diploids, triploids and tetraploids--------16(2) 106
Techniques for leaf sampling and automated analysis of sugarbeet leaf amino acids--------16(7) 530

MillPH
Miller, P. H.
Potassium ion detector for monitoring boiler feedwater----------16(2) 142

MillGA
Milliken, G. A.
Estimating general combining ability from an incomplete crossing system----------16(3) 264

MinkGI
Mink, G. I.
The relationship between agricultural practices and the occurrence of volunteer sugarbeets in Washington----------16(6) 441

MumfDL
Mumford, D. L.
Curly top epidemic in Western Idaho----------16(3) 185
Preliminary report on breeding sugarbeet for combined resistance to leaf spot, curly top, and *Rhizoctonia*----------16(3) 207

NelsJM
Nelson, J. M.
The effect of manure on sprangling of sugarbeet roots----------16(3) 191

NormLW
Norman, L. W.
Some physical characteristics of sugar crystals affecting dust formation----------16(6) 448

OlsoLE
Olson, L. E.
Control of sucrose loss in sugarbeet during storage by chemicals and modified atmosphere and certain associated physiological changes----------16(2) 117
Physio-chemical and micro-biological studies on controlled storage of sugarbeets----------16(2) 156
Evaluation of effects of controlled atmosphere storage on roots of sugarbeets grown at various levels of nitrogen fertilizer----------16(3) 225

PaynMG
Payne, M. G.
Some speculations on the role of dopamine in the resistance of sugarbeets to *Cercospora* leaf spot----------16(1) 34
Inheritance of 3-Hydroxytyramine in sugarbeet; a phenolic compound associated with *Cercospora* leaf spot resistance----------16(1) 52
Oxidative inactivation of invertase and polygalacturonase of *Cercospora beticola Sacc.*----------16(6) 516

PeayWE
Peay, W. E.
Curly top epidemic in Western Idaho----------16(3) 185

PoostI
Poostchi, I.
Effect of gibberellic acid, several growth retardants and nitrogen levels on yield and quality of sugarbeets----------16(4) 323

PostFJ
Post, F. J.
Physio-chemical and micro-biological studies on controlled atmosphere storage of sugarbeets----------16(2) 156

PottHS
Potter, H. S.
Control of *Cercospora* leaf spot of sugarbeet through aerial application of systemic and surface-protecting fungicides----------16(7) 525

RaoPSC
Rao, P. S. C.
Soil nitrate nitrogen levels as an index of nitrogen fertilizer needs of sugarbeets----------16(6) 461

RautGS
Ratuela, G. S.
Oxidative inactivation of invertase and polygalacturonase of *Cercospora beticola Sacc.*----------16(6) 516

ReedRL
Reeder, R. L.
Residual soil nitrate measurement as a basis for managing nitrogen fertilizer practices for sugarbeets----------16(4) 313

ReusJO
Reuss, J. O.
Soil nitrate nitrogen levels as an index of nitrogen fertilizer needs of sugarbeets----------16(6) 461

RichAW
Richards, A. W.
Residual soil nitrate measurement as a basis for managing nitrogen fertilizer practices for sugarbeets----------16(4) 313

RirieD
Ririe, D.
Effect of row covering materials and depth of planting on sugarbeet emergence----------16(2) 168

RitenG
Ritenour, G.
Effect of planting date and vector control on the suppression of curly top and yellows in sugarbeet----------16(1) 78

RuppEG
Ruppel, E. G.
Comparisons of beet yellows virus isolates from Arizona----------16(1) 71
The effect of manure on sprangling of sugarbeet roots----------16(3) 191
Preliminary report on breeding sugarbeet for combined resistance to leaf spot, curly top, and *Rhizoctonia*----------16(3) 207
Techniques for evaluating sugarbeet for resistance to *Cercospora beticola* in the field----------16(5) 384

RushGE
Rush, G. E.
Presidential address----------16(1) 1

RussFB
Russell, F. B.
Control of *Cercospora* leaf spot of sugarbeet through aerial application of systemic and surface-protecting fungicides----------16(7) 525

RyseGK
Ryser, G. K.
Impurity index selections on individual sugarbeets----------16(5) 399

SaluDK
Salunkhe, D. K.
Control of sucrose loss in sugarbeet during storage by chemicals and modified atmosphere and certain associated physiological changes----------16(2) 117
Physio-chemical and micro-biological studies on controlled atmosphere storage of sugarbeets----------16(2) 156
Evaluation of effects of controlled atmosphere storage on roots of sugarbeets grown at various levels of nitrogen fertilizer----------16(3) 225

SchmCL
Schmalz, C. L.
Some physical characteristics of sugar crystals affecting dust formation----------16(6) 448

SchmWR
Schmehl, W. R.
Seasonal leaf area, dry weight, and sucrose accumulation by sugarbeets----------16(3) 235
Effect of gibberellic acid, several growth retardants and nitrogen levels on yield and quality of sugarbeets----------16(4) 323
Sugarbeet growth as influenced by row width, nitrogen fertilization, and planting date-----16(7) 585

SchnCL
Schneider, C. L.
Pathogenicity of curly top virus isolates from Utah and Idaho on several hosts----------16(4) 275
Control of *Cercospora* leaf spot of sugarbeet through aerial application of systemic and surface-protecting fungicides----------16(7) 525

SchwLR
Schweitzer, L. R.
Development of monogerm sugarbeet seeds as influenced by soil fertility----------16(4) 332

SchwEE
Schweizer, E. E.
Herbicidal activity of chloroacetamides and pyridazinones on sugarbeets and weeds---------16(5) 359

SchoeK
Schoenrock, K.
The application and utility of magnesium exchange in the beet sugar process----------16(4) 299
Application of ion-selective electrodes in the beet sugar industry----------16(6) 482

SequRM
Sequeira, R. M.
A method for the determination of organic acids in sugarbeets and factory juices by gas liquid chromatography----------16(2) 136

SinghB
Singh, B.
Foliar application of pyrocatechol to prevent late growth of sugarbeet and increase sucrose content----------16(1) 45
Control of sucrose loss in sugarbeet during storage by chemicals and modified atmosphere and certain associated physiological changes----------16(2) 117
Evaluation of effects of controlled atmosphere storage on roots of sugarbeets grown at various levels of nitrogen fertilizer----------16(3) 225

SipiKM
Sipitanos, K. M.
The influence of root zone temperature on phosphorus nutrition of sugarbeet seedlings----------16(5) 408

SkoyIO
Skoyen, I. O.
A plot seeder for sugarbeet field experiments-----16(5) 422
Performance of multigerm triploid sugarbeet hybrids when space planted----------16(7) 577
